

Carleton College MNSG Activities Fall 2020

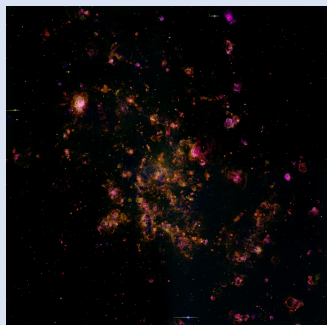

Research

Spectroscopic characterization of low-mass stars

Freja Olsen and Professor Ryan Terrien developed methods for measuring chemical abundances of low-mass stars using high-resolution spectra from the Habitable Zone Planet Finder.

Emission-line Survey & Rockets

Kyle Fraser-Mines and Professor Cindy Blaha developed a new method of imagery to more effectively reveal the evolutionary history of galaxy M33.

Informal Ed

Events
at
Goodsell
Observatory

(Pre-COVID)

Observing Transit of Mercury in
November 2019.

Young Astronomers Summer
Experience (YASE) in 2019
